AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A hair care composition comprising one or more surfactants and a polysiloxane selected from the group consisting of:
  - (a) an aminofunctional polysiloxane (A) comprising alternating units of:
    - (i) a polysiloxane according to the following formula:

and

- (ii) a divalent organic moiety comprising at least one nitrogen atom; and
- (iii) a monoivalent organic moiety comprising at least one nitrogen atom, wherein said nitrogen atom of said monoivalent organic moiety is located at a terminal position of said aminofunctional polysiloxane (A); and wherein  $\text{R}^+$  is selected from the group consisting of an alkyl group of 1 to 5 carbons, a phenyl group, an alkoxy group, and an hydroxy group; and x is from 1 to 3000; and
- (b) mixtures of said aminofunctional polysiloxane (A) and a terminal aminofunctional polysiloxane (B) according to the formula:

wherein A represents  $\text{R}_2\text{SiO}$ ;

wherein:

- R is an alkyl group of 1 to 5 carbons, or a phenyl group, or an alkoxy group or an hydroxy group;
- Q is an amine functional group of the formula  $-\text{R}^2\text{Z}$ ;
- $\text{R}^2$  is a divalent alkylene radical of 3 to 6 carbons;

Z is -N(R<sup>3</sup>)<sub>2</sub> or -NR<sup>3</sup>(CH<sub>2</sub>)<sub>n</sub>N(R<sup>3</sup>)<sub>2</sub>;  
 R<sup>3</sup> is individually an H atom or alkyl group of 1 to 20 carbon atoms or phenyl or benzyl;

and wherein:

x is from 1 to 3000;  
 y is from 0 to 3;  
 z is from 1 to 3; and  
 n is from 2 to 6.

2. (Currently Amended) A hair care composition according to claim 1, comprising the terminal aminofunctional polysiloxane (B) wherein:

R is an alkyl group of 1 to 5 carbons, or a phenyl group.

3. (Currently Amended) A hair care composition according to claim 2, comprising the terminal aminofunctional polysiloxane (B) wherein:

R is a methyl  
 R<sup>2</sup> is -CH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>- or -CH<sub>2</sub>CHCH<sub>3</sub>CH<sub>2</sub>-  
 Z is NH<sub>2</sub> or NHCH<sub>2</sub>CH<sub>2</sub>NH<sub>2</sub>

and wherein

x is from 10 to 400,  
 y is from 0 to 1, and  
 z is 1.

4. (Currently Amended) A hair care composition according to claim 3, comprising the terminal aminofunctional polysiloxane (B) wherein:

x is from 70 to 120.

5. (Currently Amended) A hair care composition according to claim 1, wherein said hair care composition comprises from about 0.1% to about 10%[.] of said terminal aminofunctional polysiloxane by weight of said polysiloxane-based-on the total composition applied to the hair.

6. (Currently Amended) A hair care composition according to claim 1, wherein said hair care composition further comprises at least one oxidative dye.
7. (Currently Amended) A hair care composition according to claim 1, wherein said hair care composition has a pH of from about 9 to about 11.
8. (Currently Amended) A hair care composition according to claim 1, wherein said hair care composition further comprises at least one additional conditioning agent.
9. (Canceled)
10. (Previously Presented) A hair colouring and conditioning kit comprising at least two components, a first component comprising an oxidising agent and a second component comprising a hair colouring agent, wherein said kit further comprises a hair care composition according to claim 1 and wherein said hair care composition is comprised within said first component, said second component or is comprised within a third component, wherein said first and said second components are mixed together immediately prior to application to the hair.
11. (Previously Presented) A packaged hair colouring and conditioning product comprising at least two chambers, a first chamber comprising a first composition comprising an oxidising agent, and a second chamber comprising a second composition comprising an oxidative hair colouring agent, wherein said package further comprises a hair care composition according to claim 1, wherein said hair care composition is comprised within said first composition, or said second composition.
12. (Previously Presented) A packaged hair colouring and conditioning product comprising at least three chambers, a first chamber comprising a first composition comprising an oxidising agent, a second chamber comprising a second composition comprising an oxidative hair colouring agent, and a third chamber comprising a hair care composition according to claim 1.

13. (Previously Presented) A method of colouring and conditioning human or animal hair, said method comprising the steps of:
  - (1) applying to the hair a hair colouring composition;
  - (2) applying to the hair a hair care composition according to claim 1; and
  - (3) rinsing the hair.
14. (Previously Presented) A method of colouring and conditioning human or animal hair according to claim 13, said method comprising the steps of:
  - (1) applying a hair care composition according to claim 1 to the hair and optionally subsequently rinsing said composition from the hair; and then
  - (2) applying a hair colouring composition to the hair and subsequently rinsing said composition from the hair.
15. (Previously Presented) A method of colouring and conditioning human or animal hair according to claim 13, said method comprising the steps of:
  - (1) first applying a hair colouring composition to the hair and subsequently rinsing said composition from the hair; and then
  - (2) second applying a hair care composition according to claim 1 to the hair and subsequently rinsing said composition from the hair.
